Re: 10629 (684 East 233rd St)

Your Parks Site Plan Review is complete. Please find 2 sealed copies of the plan enclosed; one for DOB and one for your records. Please note that having a sealed plan is not a substitute for a tree planting permit. It is recommended that prior to the planting season in which trees will be planted the landscape contractor apply for the planting permits with the PA Forestry Application. Be sure to reference the application number listed above. Should you need additional trees to fulfill the zoning requirement please apply for either off-site planting locations or payment into the tree fund once the project is in construction. The initial application number must be referenced on all future applications. **If your plans involve any work around existing trees or tree removals, you must coordinate for associated permits from the Borough Forestry office immediately.** If you have further questions, please contact this office.

Thank you,
