Re: Fees Exemption Letter
Development: Various in Citywide
Contract # BW9012141, BW9021239, BW1009603
Contractor: Metropolitan Bridge & Scaffolding Corp.

Type of Work: **Renewal of Sidewalk Shed Permit**

Dear Commissioner:

The New York City Housing Authority currently has sidewalk sheds at various NYCHA owned Developments as indicated on the enclosed list.

Under the terms of the annual cooperation agreement between the New York City and the Housing Authority dated July 1, 1997, as amended, the city agreed to furnish the Authority with all Municipal services, facilities and permits, which are normally waived for the Authority-owned properties in connection with the above project.

This is to inform you that sidewalk shed permits for various locations under the subject contract expire on **9/15/2013**. The NYCHA respectfully requests an extension for the continuance of sidewalk sheds bridge protection at the subject locations. Presently, work at these locations is not yet completed and or is estimated at a +/- 25% level of completion. It is expected that work will be completed within 12 months. The work includes removal of façade brickwork and hanging scaffolding of materials that would jeopardize the public safety should bridge not be in place. The contractor of record is Metropolitan Bridge & Scaffolding Corp.
