National Grid WO # T101839626 – 340 Beach 70th St, Arverne

Dear Mr. Myers:

This letter is to advise you that the natural gas service line to the above location was physically disconnected on May 18, 2016.

Please advise your contractor that care should be taken not to damage or remove the existing gas valve curb box. This curb box will be used in the future by National Grid to reconnect the gas service line to this property.

New York State law requires anyone planning underground excavation work to notify local utilities by making one call to a toll-free number to get your underground lines identified for you prior to doing any digging. This phone call needs to be made at least 2, but not more than 10 working days in advance of starting work, not including the day the call was made. The number to call is either the nationally sponsored "811", or the local number for NYC / LI area, 1-800-272-4480. This confirmation letter of a gas cut-off does not relieve the excavator of making this "811" call.

If you have any further questions, kindly contact me at 631-348-6264.

Respectfully,

Colleen Devine
